Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

1. (currently amended) A computer program stored on a computer-readable medium for

operating a host computer, the computer program comprising:

a code segment executed by the host computer for receiving a scheduled time of

departure or arrival for an airline flight;

a code segment executed by the host computer for receiving an updated time of

departure or arrival for the airline flight;

a code segment executed by the host computer for comparing the updated time of

departure or arrival to the scheduled time of departure or arrival for the

flight; and

a code segment executed by the host computer for automatically pushing

notification information to at least one passenger on the airline flight who

has requested notification information at the time of making the flight

reservation or to an agent of the passenger if the updated time of departure

or arrival varies from the scheduled time of departure or arrival by a

predetermined amount of time.

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

(original) The computer program as set forth in claim 1, the notification information
including information relating to the updated time of departure or arrival for the airline
flight.

- (original) The computer program as set forth in claim 1, the predetermined amount of time being between 10 - 60 minutes.
- (original) The computer program as set forth in claim 1, the predetermined amount of time being approximately 30 minutes.
- 5. (original) The computer program as set forth in claim 1, further including a code segment for receiving passenger reservation information from an airline passenger or an agent of the passenger, the passenger reservation information including information about an airline flight the passenger is reserving.
- (currently amended) A computer program stored on a computer-readable medium for operating a host computer, the computer program comprising:
 - a code segment executed by the host computer for receiving and storing in a database scheduled times of departure or arrival for substantially all U.S. airline flights departing or arriving within a certain time;

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

a code segment executed by the host computer for receiving and storing in the

database any updated times of departure or arrival for the flights;

a code segment executed by the host computer for comparing, for each of the

flights, the scheduled time of departure or arrival to the updated time of

departure or arrival;

a code segment executed by the host computer for flagging records in the

database corresponding only to flights in which the updated times of

departure or arrival vary from the scheduled times of departure or arrival

by a predetermined amount of time; and

a code segment executed by the host computer for periodically querying the

database to locate all flagged records and pushing notification information

to at least one passenger who has requested notification information at the

time of making the flight reservation or an agent of the passenger on each

flight corresponding to a record that has been flagged.

7. (original) The computer program as set forth in claim 6, the notification information

including information relating to the updated time of departure or arrival for the airline

flight.

8. (original) The computer program as set forth in claim 6, the predetermined amount of

time being between 10 - 60 minutes.

A

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

- (original) The computer program as set forth in claim 6, the predetermined amount of time being approximately 30 minutes.
- 10. (currently amended) A computer program stored on a computer-readable medium for operating a host computer, the computer program comprising:
 - a code segment executed by the host computer for receiving passenger reservation information from an airline passenger, the passenger reservation information including a scheduled time of departure or arrival for a flight reserved by the passenger;
 - a code segment executed by the host computer for receiving contact information from the passenger at the time of making a flight reservation;
 - a code segment executed by the host computer for queuing the passenger

 reservation information to a date-ranged queue using the scheduled time of

 departure or arrival of the flight;
 - a code segment executed by the host computer for receiving an updated time of departure or arrival for the flight;
 - a code segment for accessing the date ranged queue and comparing the scheduled
 time of departure or arrival to the updated time of departure or arrival; and
 a code segment executed by the host computer for automatically pushing
 notification information to the passenger who has requested notification

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

information at the time of making the flight reservation or to an agent of the passenger via the contact information if the updated time of departure or arrival varies from the scheduled time of departure or arrival by a predetermined amount of time.

- 11. (original) The computer program as set forth in claim 10, the notification information including information relating to the updated time of departure or arrival for the airline flight.
- (original) The computer program as set forth in claim 10, the predetermined amount of time being between 10 - 60 minutes.
- (original) The computer program as set forth in claim 10, the predetermined amount of time being approximately 30 minutes.
- 14. (currently amended) A method of notifying airline passengers of airline flight status changes, the method comprising the steps of:

receiving scheduled departure or arrival times of a plurality of airline flights and storing the scheduled departure or arrival times in a computer-readable memory; receiving updated departure or arrival times for the airline flights-from a source and storing the updated departure or arrival times in a computer-readable memory;

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

comparing the scheduled departure or arrival times to the updated departure or arrival times utilizing a computer not operated by the source; and

automatically pushing notification information to at least one passenger on an airline

flight who has requested notification information at the time of making the

flight reservation if the updated departure or arrival time for the airline flight

varies from the scheduled departure or arrival time for the airline flight by a

predetermined amount of time.

- 15. (original) The method as set forth in claim 14, the notification information including information relating to the updated departure or arrival time for the airline flight.
- 16. (original) The method as set forth in claim 14, the predetermined amount of time being between 10-60 minutes.
- 17. (original) The method as set forth in claim 14, the predetermined amount of time being approximately 30 minutes.
- 18. (previously presented) The computer program as set forth in claim 1, the host computer comprising a plurality of computing devices.

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

- 19. (previously presented) The computer program as set forth in claim 1, the host computer comprising a computer network.
- 20. (previously presented) The computer program as set forth in claim 6, the host computer comprising a plurality of computing devices.
- (previously presented) The computer program as set forth in claim 6, the host computer comprising a computer network.
- 22. (previously presented) The computer program as set forth in claim 10, the host computer comprising a plurality of computing devices.
- 23. (previously presented) The computer program as set forth in claim 10, the host computer comprising a computer network.
- 24. (previously presented) The computer program as set forth in claim 1, wherein the notification information is pushed through electronic mail.
- 25. (previously presented) The computer program as set forth in claim 6, wherein the notification information is pushed through electronic mail.

Amendment Dated: February 7, 2006

In Response to Office Action Dated November 4, 2005

- 26. (previously presented) The computer program as set forth in claim 10, wherein the notification information is pushed through electronic mail.
- 27. (previously presented) The computer program as set forth in claim 14, wherein the notification information is pushed through electronic mail.
